Yup. We shared the process with our web team. Alerts were sent to the GIS team, apparently not the attachments.

Part of the issue is we're supplementing a team that has been working 7 days / week for the past three weeks with folks who were on standby. So they weren't part of the change in process. And it's pretty easy to miss that detail in the pdf Eric sent.

I've sent an email to Paula to shift web support to the region. I can see a coalition of R8, R6 and R9 web folks led by 8 and still getting messaging from EOC PIO.

My team's focus needs to shift to the One EPA Web deadline now that we've shifted to a more predictable schedule relative to GKM data and updates.

The last time this happened correctly was Friday evening when Danny Hart made the notifications and included the tables that were posted.

Here is the updated Data Delivery Posting Instructions

It is extremely important that we follow these notification procedures. The last step where the HQ Web Team notifies us that files have been posted is CRITICAL so that we can deliver only data that has not been posted to the goldking site.
